- The Standard Laptop comes in a configuration that an average government user would utilize to do everyday work at home or in the office. It blends power, capacity, and economy in a medium-sized case. A Lightweight Laptop option is designed to be small and compact in size, it is excellent for traveling and a great solution for email, and/or working on documents and spreadsheets. The Performance Laptop comes in a standard configuration that supports the power user. These laptops have bigger screens, storage capacity, and higher processing power. They are good for developing graphics, developing code and using more complicated software.

Improving Professional Service Schedules - Changes are Coming!

Dated: 09/02/2014 As one of several professional services category initiatives, GSA's Federal Acquisition Service (FAS) will be working to improve its professional services Schedule offerings. A first step in this initiative will be to consolidate Multiple Award Schedule (MAS) services offerings. This discussion provides information about why FAS believes this is necessary and the next steps FAS will be taking.

Excellent Article on Market Research: "A Tale of Two Markets"

I want to thank a Washington Headquarter Services Contracting Officer Mr. Christopher E. Harris for giving me permission to post his well written article here in interact. It has a lot of information backed by regulation and case referenes. Here is the summary of his article: "The Federal Supply Schedule Market is distinct from the Open Market, and the research and acquisition planning requirements differ. Knowing these differences can produce innovation and efficiency in delivery of products and services to the warfighter."

On-going Discussion 16

Q: Now that we have started our migrations and industry is hearing more and more about Professional Services Schedule consolidation effort, we have had an increase in questions from single schedule contract holders. The big question? How do I get MY contract moved over to the new Professional Services Schedule?

[gerihaworth](#)

Will there be any webinars regarding the change, if so can you provide the link?

Response

My question has to do with the 527 Schedule contract holders with multiple professional services Schedules. In the information above, GSA states that there will be no change to the contract number or period of performance for contracts being migrated. How is that going to work when a contractor has, for example, a PES and a MOBIS?

There are approximately 527 firms who currently hold more than one contract in the affected programs.
